a protrusion being provided on an inner wall face of said door glass run body in an opposing relationship

to a rear face of at least one of said lip portions;

said protrusion having a height set so that, even if said door glass vibrates, an end portion of the lip portion may not contact with the inner face wall of said door glass run body.

3. The door glass run as claimed in claim 2, wherein said protrusion is disposed at a position nearer to a base end portion of the lip portion than a position at which the lip portion and said door glass contact with each other.

4. The door glass run as claimed in claim 2, wherein said pair of lip portions have lengths individually set so that, even if said door glass vibrates in said door glass run body, said lip portions may not be spaced away from said door glass.

5. The door glass run as claimed in claim 3, wherein said pair of lip portions have lengths individually set so that, even if said door glass vibrates in said door glass run body, said lip portions may not be spaced away from said door glass.

6. The door glass run as claimed in claim 1, wherein a notch portion is formed in a concave with respect to said inner wall face between a base end portion of the

lip portion and said inner wall face of said door glass run body and has a depth set equal to or smaller than a predetermined depth.

5           7. The door glass run as claimed in claim 2, wherein  
a notch portion is formed in a concave with respect to  
said inner wall face between a base end portion of the  
lip portion and said inner wall face of said door glass  
run body and has a depth set equal to or smaller than a  
10 predetermined depth.

          8. The door glass run as claimed in claim 3, wherein  
a notch portion is formed in a concave with respect to  
said inner wall face between a base end portion of the  
15 lip portion and said inner wall face of said door glass  
run body and has a depth set equal to or smaller than a  
predetermined depth.

          9. The door glass run as claimed in claim 4, wherein  
20 a notch portion is formed in a concave with respect to  
said inner wall face between a base end portion of the  
lip portion and said inner wall face of said door glass  
run body and has a depth set equal to or smaller than a  
predetermined depth.

25           10. The door glass run as claimed in claim 5,  
wherein a notch portion is formed in a concave with respect

to said inner wall face between a base end portion of the lip portion and said inner wall face of said door glass run body and has a depth set equal to or smaller than a predetermined depth.

5

11. The door glass run as claimed in claim 6, wherein the depth of said notch portion is set equal to or less than 0.5 mm.

10

12. The door glass run as claimed in claim 7, wherein the depth of said notch portion is set equal to or less than 0.5 mm.

15

13. The door glass run as claimed in claim 8, wherein the depth of said notch portion is set equal to or less than 0.5 mm.

20

14. The door glass run as claimed in claim 9, wherein the depth of said notch portion is set equal to or less than 0.5 mm.

25

15. The door glass run as claimed in claim 10, wherein the depth of said notch portion is set equal to or less than 0.5 mm.
